

Digital Transformation at Primary School

Tuğçe ÖZNEMLİ
Homeroom Teacher

We have been going through many changes and transformations along with the pandemic. Probably, the most significant change was the rapid digitalization of educational processes. Technological applications and restructured learning designs used in this process which compelled us to rapidly digitalize made education to continue in flexible environments.

The technical infrastructure, platforms and applications used, and the learning designs planned in accordance with flexible learning environments aimed to realize the distance and hybrid education processes in the most efficient way.

Hybrid Models at Middle School

Başak BASMAN
Mathematics Department Head

The Covid-19 pandemic that we have been experiencing for quite a long time is still with us, leaving a trace in every aspect of life. Each new day comes with a change. Reflections of this change touching the education have been persistent since the very first day of the pandemic. Since the first day of the pandemic, our excitement to reach our students, keep connection with them and use technology still continues with a change in the way we feel it. It is evident that, as a school that places great importance on taking advantage of each situation and making new gains, we will go through the pandemic by becoming stronger and finding solutions to some of the educational shortcomings we experienced at school before the pandemic. Covid-19 Pandemic rapidly introduced solutions that will minimize place and time limitations in our lives.

TeacherX: "As Teachers Improve, Society Changes"

Dr. Işıl Boy ERGÜL
ETZ Founder

Selin Bozkurtlar PEÇE
TeacherX

TeacherX is an online teacher training platform that adopts sustainability of vocational development as a principle, offers teachers with the opportunity to receive training wherever and whenever they want with its staff consisted of academicians and trainers who are experts in their fields, and involves learning communities, self-assessment systems and rich resources. TeacherX is born to emphasize that the greatest importance should be attached on teachers in school environments, where the technology is prioritized, especially after the pandemic. When watching theatre, you cannot expect a better theatre play to be staged when you change and enrich the decor. Similarly, teachers play a leading role at schools. We can create a difference when we contribute to our teachers' vocational development and well-being.

Make a Difference in Your Class with the "Google Educator" Certificate!

Dilara VARDAR
Information Strategies Center
Coordinator

Sezin FİNS
Computer Science Teacher

We recommend our teachers of all branches to apply for "Google Educator Level 1" and "Google Educator Level 2" certificates, and support them as required. The contents that all teachers will benefit from include diversification in education, analyzing students data, designing an interactive curriculum, creating a positive digital environment in the classroom. Mentioned content will improve your self-confidence in these fields while giving you a different perspective from an educator's eye.
