

Trends Shaping Education 2022

Gülçin CIRIK DOĞRAMACI
Assistant General Director

[Trends Shaping Education 2022](#) report was published by OECD on January 18th, 2022. On the same night, I had the chance to attend a webinar along with education experts from different fields, where Andreas Schleicher, OECD Director for the Directorate of Education and Skills presented this report. These regular webinars and similar reports provided by OECD allow us, educators, to better comprehend what is on the horizon for us and the education system and allow us to better prepare for the future.

Electronic Portfolios: Google Slides & Google Sites

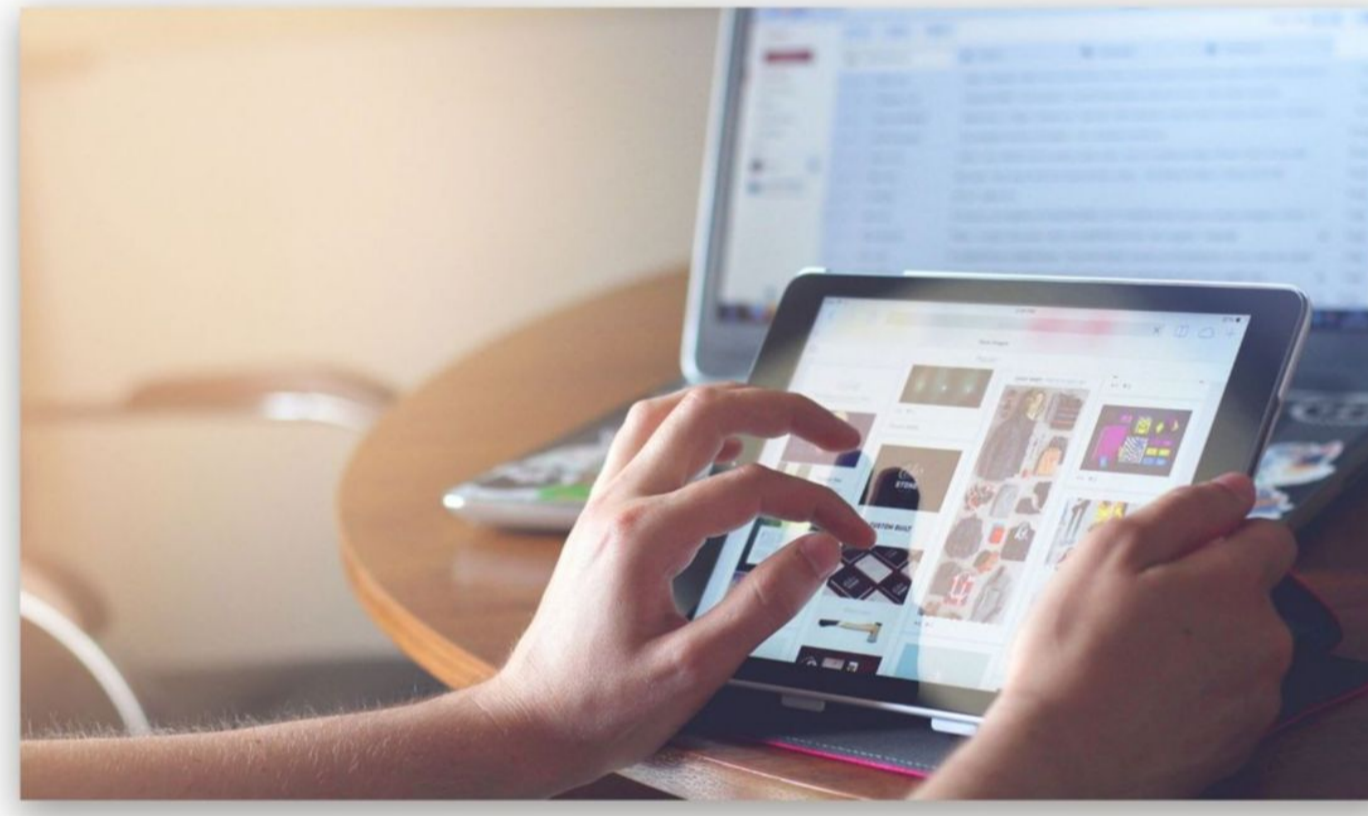

Emine KUTAY
Computer Science Teacher

Tuba BOZİK
Computer Science Teacher

E-portfolios can be defined as a "content management system" which facilitates the gathering, evaluating, sharing, and presenting the learning results via a digital medium. E-portfolios allow the students to keep, access, update their portfolios and present them in various electronic formats (Chang, 2001).

Do Not Ignore Cyber Safety Precautions

Onur AKBUDAK
System Network Manager

As the cybercrime rates increase during the Pandemic, companies and even the governments suffer cyberattacks that cost millions of dollars.

Therefore we must be prepared against ransomware attacks, phishing attacks, credit card frauds, and social engineering attacks which we can be a victim of at any time. Utilization of solely security offerings on your computer to protect this information is not sufficient. Keep in mind that the reason behind the 95% success rate of these cyber attacks is human error.

Common Sense School Accreditation

Dilara VARDAR
Information Strategies Center
Coordinator

As of 2016, our digital citizenship activities are regularly accredited by <https://www.common sense.org/Common Sense>, which is the single most important organization worldwide with regard to this subject. We would like to announce that recently we have successfully completed the accreditation process regarding the 2021 - 2023 period.
